PACIFIC MODELS are produced by Ian Wilson, originator of the **PROTOTYPE MODELS** range of cardboard construction kits and a former director of **SLATERS PLASTIKARD**. So my modelmaking pedigree goes back a long way!

I have a full range of smokebox numberplates with correct variations in style for locos running on British Railways in 1955 or later, and can now produce LMS style numbers and selections of my BR numbers to special order.

There is now a full range of Carriage Destination Boards for all regions of British Railways in 4mm & 7mm scales, and Pre-Nationalisation sheets are available to order.

On page 4 are our popular DMU Destination Blinds & EMU Numeric Codes I - covering all UK regions and Southern EMUs.

Page 11 features smokebox destination boards for suburban trains out of Liverpool Street and new this year for trains out of Kings Cross.

I am a member of the NMRA and an active modelmaker in multiple scales - both British and American.

The photo above is of Bridgefield Quarries, my 0 gauge layout which has featured recently in Railway Modeller in the UK and Model Railroad Planning in the USA

THE ABERDONIAN KING'S CROSS - ABERDEEN

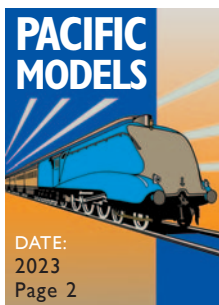

2406

2561

The view above is on my HO scale layout of Bangor, Pennsylvania, and shows Erie Lackawanna F-units as they enter the yard with a long coal train.

BRITISH RAILWAYS SMOKEBOX NUMBERPLATES

PRICE LIST

If you plan to customise a locomotive with the number of your choice, the trickiest part is patching together a smokebox numberplate from a decal sheet. Our range of smokebox numberplates aims to give you the whole class. You may only need one number but it will save a lot of time – and you can share your sheet with friends!

Special requests welcome! If the loco you want isn't on our list, or you want a different colour background or style – let us quote you.

STEAM ON SHED SELECTIONS

Save money with our custom numberplate service.

4mm/foot – OO/EM/P4

7mm/foot – O Gauge

If you have a collection of locomotives to re-number and don't want the expense of buying all the separate sheets for each class, we can provide you with just the numbers you require on one custom sheet.

So, if you are modelling a rural branch line we can supply a selection of numbers from typical locos on the line...

For instance – a Western Region branch might have 1400 class auto tanks, 4500 prairie tanks and 5700 panniers, perhaps some 2251 0-6-0s – we can create your own selection on one sheet.

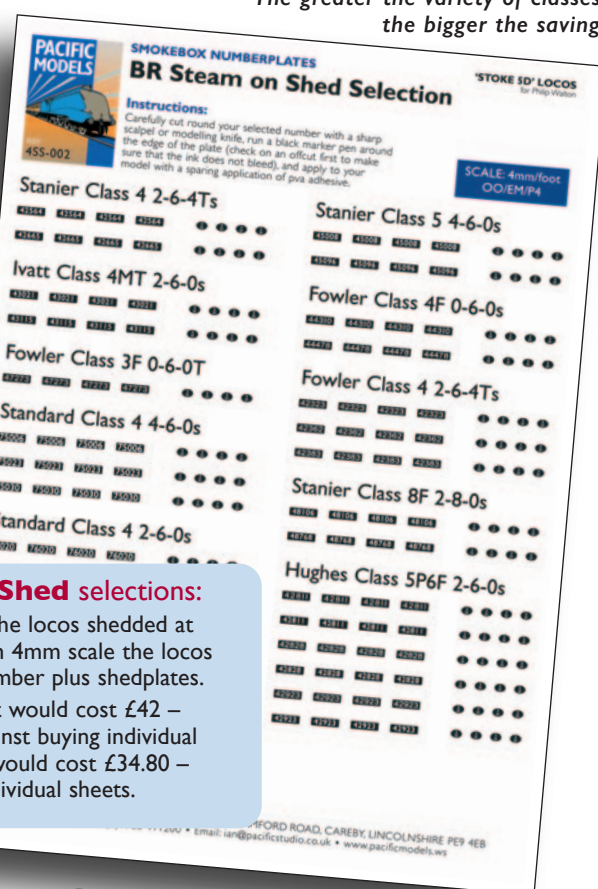

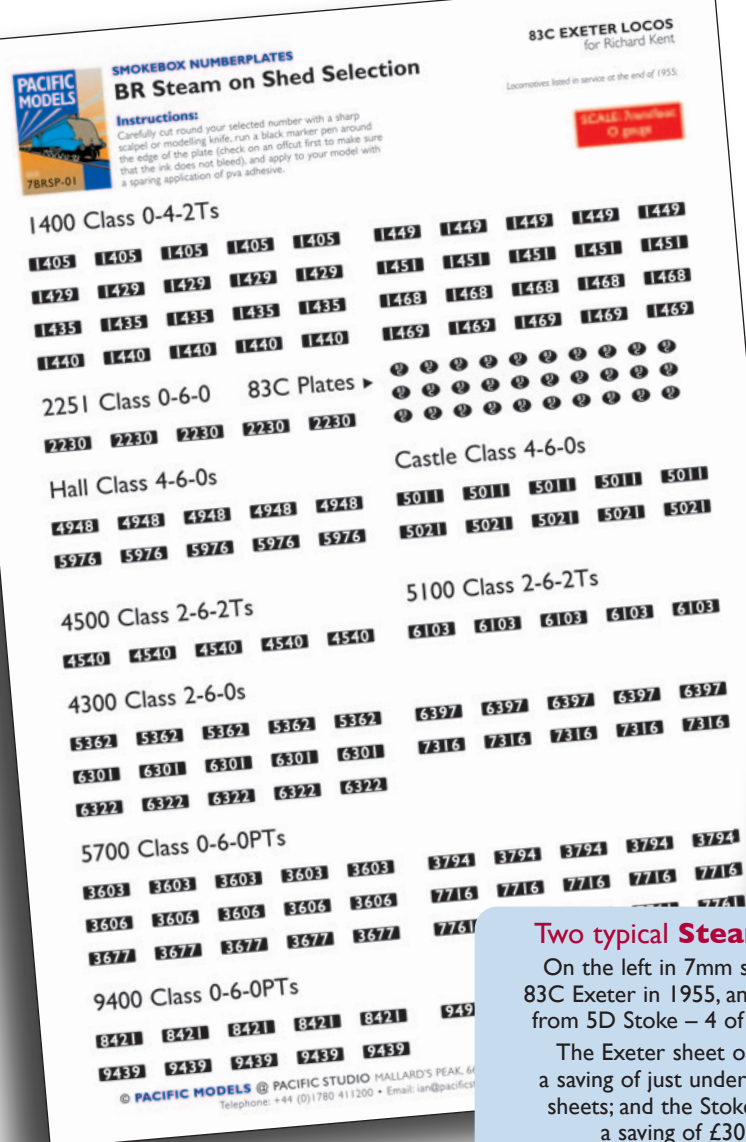

Eastern Region 'curly' 6s & 9s can be provided on these custom sheets too. Check photographs of the locos you're modelling taken at the period of your model, as some locos carried both styles at different times.

Let us have a list of loco classes and numbers you require...

We have a minimum charge of £18 for 4mm sheets and £24 for 7mm sheets to cover set up costs – then we charge 60p per numberplate or shedplate, but we will provide you with at least 4 copies of each plate! In the examples below the 7mm scale Exeter sheet has 29 individual numbers plus the 83C shedplates, and the 4mm Stoke sheet has 27 numbers plus 5D shedplates.

The greater the variety of classes, the bigger the saving!

60009

Two typical **Steam on Shed** selections:

On the left in 7mm scale all the locos shedded at 83C Exeter in 1955, and right in 4mm scale the locos from 5D Stoke – 4 of each number plus shedplates.

The Exeter sheet on the left would cost £42 – a saving of just under £28 against buying individual sheets; and the Stoke sheet would cost £34.80 – a saving of £30 over individual sheets.

SMOKEBOX NUMBERPLATES

LMS STYLE NUMBERPLATES

Serif or Sans Serif Style Plates to order

INDIVIDUALLY PRODUCED TO ORDER

- Let us have a list of numbers you require.
- Tell us whether you want serif or sans serif numerals.
- Research your prototype as not all locos had numberplates!

It's always advisable to research photographs before ordering as not all locomotives had front numberplates - for instance Sentinel Shunters, Beyer Garratts and ex-LNWR G1/G2 0-8-0s.

We have a minimum charge of £10 for 4mm or 7mm sheets to cover set up costs and return postage. We then charge £2.50 per numberplate, but we will provide at least 4 copies of each plate!

43012 Sans serif font 5 digit with BR number

8537 Sans serif font 4 digit plate

40 Serif font 2 digit plate

196 Serif font 3 digit plate

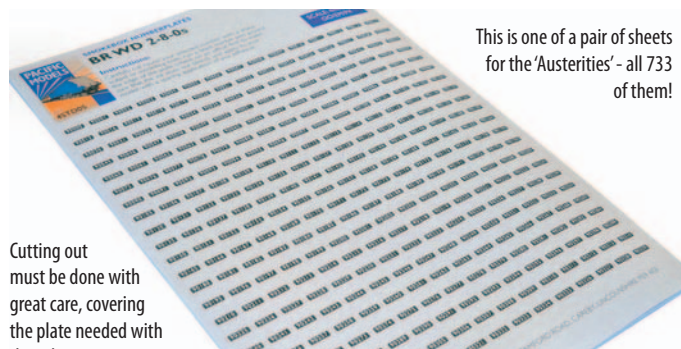

4759 Serif font 4 digit plate

13248 Serif font 5 digit

M2730 Serif font 4 digit with sans 'M' initial

Pacific Models' 4mm smokebox numberplates

As mentioned last month, **Tony Wright** exploits these brilliantly-simple products.

This is one of a pair of sheets for the 'Austerities' - all 733 of them!

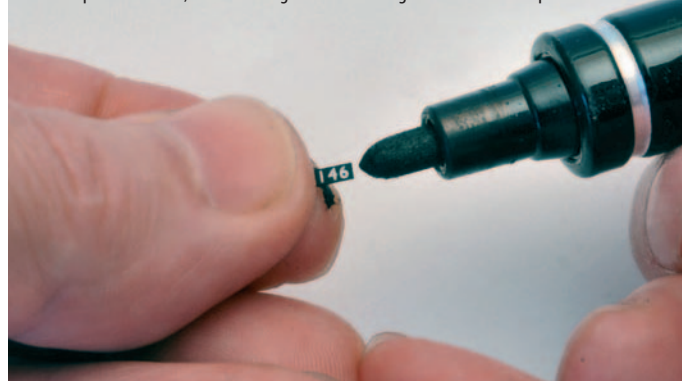

Cutting out must be done with great care, covering the plate needed with the rule.

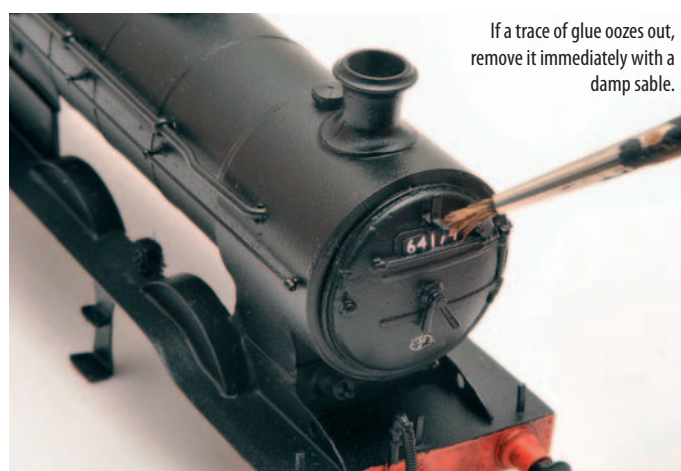

Named locos usually come with an etched front numberplate in the pack. However, for non-named locos, though the list of etched plates is growing, the usual method of replication is to use a transfer sheet. Fine, though it's my experience that the number one requires is never present on a sheet and 'cutting and pasting' is necessary, sometimes in three bits. And then the transfers float

all over the place and don't match up. Wouldn't it be nice if someone made a sheet of front numbers for every loco in a class? Well, Ian Wilson of Pacific Models has. They're printed on high-grade paper and merely need cutting out. In terms of ease of use and value for money, these products are unsurpassed! Anyway, the pictures show how they're employed.

Once the plate is cut out, the white edge needs touching with a black felt-tip.

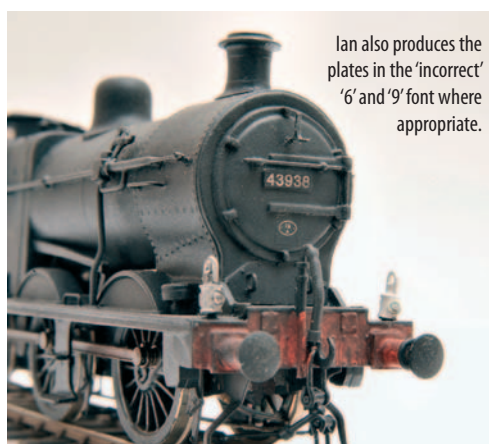

I made a backing plate from scrap etch, fixed prior to painting, then applied a touch of PVA.

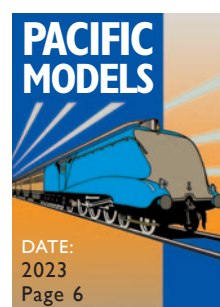

If a trace of glue oozes out, remove it immediately with a damp sable.

The finished job - so much easier than fiddling with transfers.

Ian also produces the plates in the 'incorrect' '6' and '9' font where appropriate.

BR DESTINATION BOARDS PRICE LIST

Add the finishing touch to your express trains with these card carriage destination boards. Simply cut out as required with a sharp craft knife or scalpel, touch up exposed edges with the appropriate colour and apply to your passenger stock. Boards are provided with trimming guides for BR Mark 1 coaches. We recommend a rubber or latex style adhesive for removable boards, or an impact adhesive or double sided adhesive tape for a more permanent fixing.

& Midland Region sections**

BR CARRIAGE DESTINATION BOARDS PRICE LIST

Add the finishing touch to your express trains with these self adhesive carriage destination boards. Simply mount onto the thin card provided and cut out as required with a sharp craft knife or scalpel. Touch up exposed edges with the appropriate colour and apply to your passenger stock. Boards are generally a scale 11ft for BR Mark 1 coaches, but on BR(E) sheets shorter 8ft boards are also provided for Thompson or Gresley coaches, and on some BR(M) sheets 12ft boards are provided for ex LMS stock. We recommend a rubber or latex style adhesive for removable boards, or an impact adhesive or double sided adhesive tape for more permanent fixing. *(Quantities stated are provisional at this stage).*

USA EASTERN ROADS DIESEL NUMBERBOARDS & DETAILS

PRICE LIST

If you plan to customise a locomotive with the number of your choice, the trickiest part is patching together four numberboards from a decal sheet. Our range of diesel numberboards aims to give you the whole class, with variations in style. You may only need one number but it will save a lot of time – and you can share your sheet with friends!

Special requests welcome! If the loco you want isn't on our list, or you want a different colour background or style – let us quote you.
